

Water Management Product

Freshwater Vegetation Management

WH-1800 Aquatic Weed Hunter

While offering portability comparable to the core model WH-1500, it features a wider cutting width for more efficient harvesting. It performs effectively in areas where aquatic vegetation is widespread, but accommodating a larger cutting vessel is challenging.

It is active in a wide range of areas, including limited spaces such as moats and vast places like lakes and ponds.

WH-1800 Aquatic Weed Hunter

Length	9200mm	Storage & Unloading Conveyor	Harvesting Head
Width	4360mm		
(shipping)	2490mm	Maximum Weight	approx.1300kg
Height	2400mm	Maximum Volume	approx.6m ³
Weight	approx.3900kg	Unloading Height	0~1200mm

All Specifications subject to change without notice.

OPTION

We offer options to enhance mobility, safety, and other features.

Support Barge

It can enhance the stability of the hull. It helps suppress tilting when carrying maximum load and prevents capsizing during rough waves.

Outboard motor

Two outboard motors are installed at the rear of the hull, assisting with navigation using paddles during long-distance water travel and increasing movement speed.
